**A\_Service**

```
graph LR; SOAP[SOAP] --> Action[Action]; Action --> EJB[EJB]; EJB --> DB[(DB)];
```

The image shows a screenshot of a BPMN editor interface. The main workspace displays a BPMN diagram for 'A\_service' with a flow from 'SOA P' to 'Transformer' to 'Action' to 'EJB Call'. A red arrow points from the 'Action' element in the main diagram to a zoomed-in view of the 'A\_Service' diagram below. This zoomed-in view shows a sequence of components: 'SOAP', a crossed-out connector, 'Action', 'EJB', and 'DB'. The 'SOAP' component is highlighted with a red box and an arrow pointing to it from the left.
