Here is an example of the bug using quickstarts:

1) I have removed quickstart applications LinkedIn (git\quickstarts\camel\camel-linkedin) and ErrorHandler (git\quickstarts\beginner\camel-errorhandler) using the Eclipse GUI and according to that I have succeeded with the uninstall:

- ∨ 🖴 JBoss Fuse 6.3 Runtime Server [Started]
  - 🗗 fuse [Stopped]
  - ∨ ◉ JMX[Connected]

These quickstarts have been loaded directly from the quickstarts GIT repository on about July 27.

2) However I have failed to uninstall these two, which I can see in numerous ways:

- ∨ ◉ JMX[Connected]
  - › ⊪ amq
  - ⊕ Bundles
  - ∨ ꛁ Camel
    - › ꛁ camel-1

```

3) osgi:uninstall works

In this case running command *osgi:uninstall 409 410 405* works (I seem to have installed errorhandler twice in two different ways, but this issue is about when I install these with maven/devstudio).

```
v  JBoss Fuse 6.3 Runtime Server  [Started]
      fuse  [Stopped]
   v  JMX[Connected]
      >  amq
         Bundles
      v  Camel
         >  Currency
         >  CustomsDeclaration162
         >  CustomsDeclaration162
         >  CustomsDeclaration162
         >  FtpReadTest
      >  MBeans
```

```
 99% [=============================================================================>]
100% [==============================================================================]
```

4) P.S. I was unable to make LinkedIn module to function. I have *not* made error report of it.
