

Import tab

The screenshot shows the 'Import' tab in the BPM Suite. The interface includes a sidebar with a 'Decision Navigator' and a main area with an 'Import' dialog. The 'Import' dialog has a search field and a grid of importable files. Annotations A-F highlight specific UI elements:

- A**: Selected tab - screen with search field, similar to Data Types.
- B**: Primary button: Click to launch import dialog.
- C**: Card view layout, based on [PatternFly card view](#) pattern.
- D**: Inline editable card name, with path to project directory.
- E**: Hover state for card, with Remove button. Newly imported cards should be added, top-left.
- F**: DMN model file assets count, with icon. Represents "Data types # | Canvas node components # (Decisions...)"
