

Topic Creation

`topic.creation.enable = true/false`

Defaults

Replication Factor:

`(topic.creation.default.replication.factor)`

Partitions:

`(topic.creation.default.partitions)`

Cleanup Policy:

`(topic.creation.default.cleanup.policy)`

Compression Type:

`(topic.creation.default.compression.type)`

Topic Groups

Name:

Include:

Replication Factor: <input type="text"/>	Partitions: <input type="text"/>
Cleanup Policy: <input type="text"/>	Compression Type: <input type="text"/>
Retention duration: <input type="text"/>	

+ Add Topic Group

`topic.creation.groups` - (comma-separated list of topic groups. Adding topic group adds the topic group name to this list)

Each Topic Group properties are generated using the user-entered topic group name

`topic.creation.name1.include`
`topic.creation.name1.replication.factor`
`topic.creation.name1.partitions`
`topic.creation.name1.cleanup.policy`
`topic.creation.name1.compression.type`
`topic.creation.name1.retention.ms`
